

MD. SALAUDDIN

SOFTWARE ENGINEER (Frontend+Backend+DevOps+SQA+UI/UX)

+8801902061020 | ahmedsalauddin677785@gmail.com | Portfolio | Github | Linkdin

CAREER OBJECTIVE

Experienced Software Developer with 2 years of expertise in building maintainable software systems across the full SDLC. Proven track record delivering production systems including AI-HRM, Club, School, Hospital Management, and Multi-vendor E-commerce workflows. Eager to tackle new engineering challenges, adapt to emerging technologies, and drive high-impact client solutions.

PROFESSIONAL EXPERIENCE

Junior Software Developer - PEPOLTEK LTD December 2024 - Present

- Engineered scalable REST APIs using Django REST Framework and maintained production-grade backend systems.
- Built backend architecture for Club Management System, Talent Tracker (**talenttracker.net**), and Pepoltek (**pepoltek.com**) using DRF, **TypeScript**, and **Docker**.
- Contributed to full-stack features for AI-HRM TalenTEK (**talentek.bd**) using Next.js and JavaScript for seamless frontend integration. Automated deployment processes, reducing **deployment** times from 4 hours to 30 minutes.
- Improved API performance (~30%) through caching strategies and optimized database queries.
- Managed VPS deployments and production systems, reducing infrastructure costs by ~20% via server optimization.

SKILLS

Languages: Python, JavaScript, C, C++, Java, SQL, NoSQL

Web Technologies: NextJS, TypeScript, React, JavaScript, Zustand, CSS, HTML5.

Frameworks: Django, Django REST Framework (DRF), FastAPI (learning)

Databases: MySQL, PostgreSQL, SQLite, MongoDB, Redis, DynamoDB (AWS)

Paradigms: Object-Oriented Programming (OOP) in Python, Async programming, Functional programming

Tools: Git, GitHub, Gitlab, Bitbucket, VS Code, Antigravity, Pycharm, Postman, Swagger, Pytest

DevOps: CI-CD, AWS, VPS, Docker, Kubernetes (Running), Web server (Nginx), Linux, Grafana, Loki, Prometheus

AI Technologies: Generative AI, LLMs, RAG, Prompt Engineering, Vector Embeddings, pgvector, AI Agents, OpenAI API

Design: System Design(Basic), Factory, Singleton, Strategy, Repository, Observer|Monolith, Microservices|SOLID, DRY, KISS

Problem solving: LeetCode, Codeforces, HackerRank

EDUCATION

B.Sc. in Computer Science & Engineering April 2026 — Present

Northern University Bangladesh CGPA 3.85 out of 4.00(1st semester)

Diploma in Computer Science & Technology May 2021 — March 2026

Brahmanbaria Government Polytechnic Institute CGPA 3.51 out of 4.00

PROJECTS

Multi-Vendor E-commerce Platform [Live](#) [GitHub](#)

Technologies: Django, DRF, PostgreSQL | Next.js | Typescript | Zustand | Docker | Nginx

- Built a full-stack multi-vendor e-commerce platform with a role-based system (Admin, Vendor, Brand, Customer) and approval-driven workflows.
- Implemented secure JWT authentication and an admin-controlled vendor, brand, and product approval system.
- Developed product, cart, and multi-vendor order management with an integrated payment gateway (SSLCommerz).
- Designed modular backend architecture with Dockerized deployment for scalable production use.

TALENTek – Enterprise Multi-Tenant AI-HRM Platform [Live](#)

Technologies: Python, Django, DRF, PostgreSQL, Pgvector, Next.js, Zustand, Redis, Docker, CI/CD, Nginx, Linux, Cloudflare

- AI-Driven Screening & Interviews:** Built an LLM and pgvector parser cutting CV screening time by ~65%, alongside an autonomous interview engine with AI proctoring.
- Smart Onboarding & JD Builder:** Developed a chunked RAG chatbot for new-hire policy retrieval and an automated JD builder with de-biasing and clarity scoring.
- Interactive ATS (Kanban):** Engineered a real-time applicant tracking pipeline using Next.js 16, @dnd-kit, and Zustand featuring optimistic UI updates.
- Multi-Tenancy, Fintech & DevOps:** Architected zero-trust tenant isolation with SSLCommerz billing; containerized services via Docker, cutting release time from 4 hrs to 30 mins.

COURSE & CERTIFICATIONS

Backend Web Development (Django & DRF) | Phitron — [Certificate]

Professional Spoken English Training | 3-Month Program — [Certificate]

DevOps Fundamentals | Ostad — [Certificate]
